Projects

Skill-Synthex★

- Designed and developed an **AI-powered career recommendation platform** that predicts suitable technology roles based on users' skill profiles.
- Integrated machine learning models with a **full-stack architecture** to provide real-time career predictions, skill gap analysis, and personalized learning roadmaps.
- Developed robust **REST APIs**, managed database operations, and created an interactive user interface to deliver a seamless end-to-end user experience.
- **Tech Stack:** React, Node.js, Express.js, Python, MYSQL

Password K★

- A **novel password generation system** that transforms inputs into **secure, symbol-enhanced strings** using **deterministic randomness**.
- Uses **repeated character detection** and **key-based substitution** to enhance security while ensuring **usability** and **OS compatibility**.
- **Tech Stack:** Node.js, Express.js, React, JavaScript, MYSQL

Work Experience

Full-Stack Web Developer (Independent Project Deployment)

password-k-frontend.vercel.app

- Built, tested, and **deployed** a secure full-stack password generation web application to **Vercel** for production use.
- Optimized frontend components and streamlined backend communication to ensure low latency and smooth **cross-platform usability**.

Achievements

- 2nd Prize – CMOS Technology Presentation, Youth Ideathon (Dec 2022)
- 3rd Prize – Air Architecture, Engineers Day (Sep 2023)
- Participant – Myntra Hackathon

Extra-curricular Activities

- Performed in a dance drama on International Women's Day (Mar 2024)
- Participated in Science Quiz on National Science Day (Feb 2023)
- Volunteer at NSS (National Service Scheme)
